**Chris Confer / Nora Ramirez / Marco Ramirez** are nationally recognized leaders in mathematics education and they will...

- clarify why mathematics for young children has to change
- help you understand how foundational concepts and skills pay off in later grades
- teach you instructional practices that enable students to think, reason, solve problems and communicate mathematically
- share differentiation strategies for all students: Title 1, Gifted, English Language Learners, and Exceptional Education
- show how to adapt your present teaching practices to simplify your transition and maximize your outcome
